

Tri County Electric Cooperative, located in the Panhandle of Oklahoma, requests fixed unit price bids for **Permanent Repair** of its distribution system in Beaver County, Oklahoma caused by an **Ice Storm** in January 2017 (**FEMA/OEM DR4299 PW53**). The work consists of re-spanning, replacement of conductor, removing and relocating poles and cross-arms and installation of additional poles and cross-arms on 271.2 miles of single-phase and 353.4 miles of three-phase lines. All work will be performed pursuant to staking sheets and construction standards provided by TCEC. Time is of the essence. Permanent repair work is expected to begin in the Second quarter of 2019 however, the completion of all projects is expected to extend continuously over multiple years. TCEC may select one or multiple firms to ensure timely and cost-efficient completion of all projects. Material will be staged at a location in central Beaver County. Quantities shown are approximate. Total miles could be reduced or increased with no change to unit cost bids.

To receive consideration, bid packages must be developed and submitted within these parameters:
